Our team specialises in the design and installation of hard-wearing epoxy for your floors.

Let's Find Out The Most Common Misconceptions About Epoxy Floors

Now, let's dive into the reality of epoxy floors. Are all the things we hear and read about epoxy are true? Let's find out.

#1 Epoxy Flooring Is Slippery.

This is probably among the first impressions when epoxy flooring is brought up. Epoxy has a smooth and highly reflective surface, making it look slippery. In spite of that, epoxy is far from being slippery. It is actually **skid-resistant**, and you could opt for additional anti-slip features if you want. Likewise, you could add raised bumps for additional user safety.

More industrial buildings, hospitals, and other establishments are choosing epoxy for their floors, not just because they want it but because it is ideal and promotes a safer working environment.

#2 Epoxy Coatings Are Expensive.

"It's too expensive." That's what most people say. Although

they also say it with anything professionally installed.

Economical is a better word in the case of epoxy floors. They are durable, long-lasting flooring solution that gives you value for your money. It is an investment that saves money in the long run with minimal maintenance. Going for cheaper options only increases your expenses for repair and maintenance.

#3 No Need For Professional Installation.

You definitely need a professional for epoxy flooring

You've probably encountered DIY epoxy coating kits on home improvement stores and thought, "Well, I can do it." Of course, you can! BUT do you really want to take your chance on it?

Firstly, these 'kits' don't have the same quality compared with professional-grade ones used by most flooring specialists. Plus, there are tools that are required for a more pleasing result.

Secondly, it's not as easy as how it looks. People who are expert on the field have years of experience and training doing it. It's the reason why it looks easy on them. They are well-trained in using the tools and techniques in installing an epoxy floor flawlessly. As a result, you get a properly installed flooring that will last long.

Attempting to do it on your own may result in a defective floor that may soon need to be replaced. Not convinced? Check this extensive article about why hiring a professional epoxy floor installer is better than doing it yourself.

#4 Re-coating Every Few Years.

Epoxy is a strong and durable flooring solution that lasts up to 15 years. Amazing, isn't it? It probably has longer life span compared to other floor types.

Additionally, epoxy floors can withstand heavy foot and vehicular traffic. It could as well tolerate the wear and tear caused by heavy machinery and equipment.

This product hardens once applied, so it doesn't require repair for a long time.

#5 Epoxy Floors Are Hard To Maintain.

Aside from the fact that it doesn't chip or stain, epoxy floors are simple to clean. You don't need harsh chemicals to do the job. Soap and water are fine.

Epoxy floors don't need much of your attention so just sit back, relax, and look how beautiful and clean your floor is.

#6 Paint And Epoxy Are The Same Thing.

Application looks very similar but these two are different from each other. Sure thing, paint is a protective coating, too, but it doesn't have the same results and benefits of epoxy.

Epoxy creates an impenetrable barrier once installed. It is a moisture-resistant resin, and paint is far from being one.

#7 Epoxy Are For New Concrete Floors Only.

Epoxy over your existing floor is very much possible. It can be applied to both existing and new floors. The catch is you need to make sure that your existing floor is stable enough to take the coating. Preparations are to be made like cleaning and roughing the surface to ensure a good result.

resurfacing your floor. Read more about Epoxy over Tiles [here](#).

#8 Epoxy Floors Are Dull.

Epoxy has a power to transform a plain concrete floor. Aside from its strong features, epoxy can also be aesthetically pleasing. It is highly customizable with various colour options to choose from. You could choose from available patterns and designs or make your own.

With epoxy as your choice, floor brightness increases up to 300%, adding value and beauty to your space.
