In Australia, the food processing area must follow sanitary, safety, and quality regulations for the staff and employers. Epoxy Flooring Brisbane ensures that wherever hygiene is of importance, safe and secure epoxy or polyurethane products are used to keep the floor free from bacteria. That can prevent food contamination.

Hygiene Epoxy Coating Safeguards The Floor From:

- Contamination during work
- Chemical resistance allowing easy cleaning
- Prevent mold and fungal growth
- Easy maintenance

We at Epoxy Flooring Brisbane, use antibacterial and food safe epoxy and confirm that these products are seamless, has great resistance to cleaning chemicals, and is hygienic.

The Types Of Products We Use For Food Processing Area Is:

- **Polyurethane Coating:** this hygienic coating not only decorates the floor but also is easy to clean. It has less abrasion and most of all are chemical resistant.
- **Epoxy Coating:** Epoxy is considered to be the most durable of all and a hygienic solution for food processing areas. Together with a chemical wash, pressure wash can also be used to clean the epoxy coated floor.

Believe me, we have got you covered.

So, what is Food Safe Epoxy?

Food safe epoxy is a raw material (in adhesives) suitable for

use in the food industry. It provides excellent resistance to food, water, heat, and cleaning chemicals. Mentioned chemicals are perfect for alignment and are cured easily by heat.

Epoxy Flooring Brisbane ensures that all its products are hygienic, durable, and safe as a flooring system. These products are chemical resistant, shock resistant, durable, and can withstand impact from heavy vehicles and machinery. In addition, all products used by Epoxy Flooring Brisbane are anti-slip, easy to clean and most of all is functional.

Advantage Of Using Food Safe Epoxy

- Anti-Bacterial
 - Easy to clean
 - Resistant to chemicals
 - Resistant to Thermal shock
-
- Tolerates wide range of temperatures
 - Slip resistance
 - Stain proof
 - Non absorbent

Why Epoxy Coating Food Processing Area Is Important

Food processing area must always follow strict government standards. This is because there is a certain food that contains hazardous materials. And if managed improperly, can lead to unwanted penalties from the government.

For this reason, many restaurants and food chains make sure that safety measures are met. Ensuring that sanitary procedures become an essential part of their business.

Some food bioproducts such as sugar, acids, oil, and fats are meant to be present on food processing area floors making it dangerous for its users.

It is very important that the floors, indoors and outdoors are always kept clean. This is to ensure meeting safety procedures. As the health department has regular inspections.

Epoxy Flooring Brisbane has been applying an epoxy floor coating system all over Brisbane in food processing areas. These floor coatings prevent mess and protect the floor. The epoxy-coated floor is easy to clean, making work easier for cleaners. It also gives long life to the floor reducing floor maintenance cost.

Apart from the above-mentioned benefits, Epoxy floor coating is now been used in the food industry frequently. For one, it provides protection against harmful acids. Epoxy Coated floors also have excellent bonding capabilities and tolerate tough cleaning chemicals and procedures.

Since cleanliness is the key factor in the food processing industry, epoxy-coated floors have shown a lot of success in keeping the work area spotless and safe. Safe because the floors become anti-slip allowing quick and easy movement and almost no safety issues.

There are other benefits of having epoxy floors from this external article and might help you decide better.

Requirements

There are a few requirements needed before a project approval to proceed. We prefer the project area cleared and cleaned free from debris. In addition, cars and traffic removed to ease work. In addition, our staff works around the clock for project completion. Thus, making the garage available for our clients at the earliest.

Warranty

Firstly, we give a one-year workmanship warranty against peeling and delamination. Secondly, the warranty does not cover moisture-related and negligent issues. A manufacturer certificate, on the other hand, could be offered if it has been mentioned prior to the start. As the manufacturing representative has to assess the project to be able to issue the necessary certification. We do not offer a warranty for substrate failure such as cracking of floors, shifting, or crumbling of the concrete.

Occupational Health and Safety

As part of our commitment to achieving the principles of health and safety in the workplace. The company, Epoxy Flooring Brisbane, recognizes its moral and legal responsibility to provide a safe and healthy work environment for its employees, contractors, customers, and visitors.

This commitment also extends to ensuring that our operations do not place the local community or environment at risk of injury, illness, or damage. Furthermore, we also declare a no-smoking zone due to the material used.
