Getting quality work done is not an expense but rather an investment. And in Epoxy Flooring Brisbane we are happy to meet all the line marking you may need. We offer a wide range of high-quality line marking services to commercial, industrial, and also to residential premises all over Brisbane.

Every day, our team aims to improve and use the latest innovative techniques to satisfy our customer's needs. So, from top-of-the-range machinery and premium paints and aggregates, we ensure that quality is maintained.

With our fully qualified team, we provide the best advice and recommendations as possible. We also ensure to meet Australian standards.

Line Marking History

In Australia, Line markings were first used in the 1920s by

Brisbane Police. They painted the pedestrian crossings central lines along the roads. Later machines were introduced to ease the work as demand for marked lines increased.

Epoxy Flooring Brisbane has been in operation for the last 2 decades but operates under a different business name. It has grown to a recognised service provider providing exceptional service to both commercial and industrial industries.

So, what is Line Marking

Line Marking are lines used on any surface to guide users to convey information on safety and minimise confusion.

While there is a continuous effort to improve the marking system, new technology has *added retro-reflectivity, an increase in longevity, and lower installation costs.*

To meet all this, Epoxy Flooring Brisbane offers full line marking service all over Brisbane.

Line marking for concrete resurfacing and epoxy coating in warehouse

-

Why is line marking important?

Updated with the latest technology, Epoxy Flooring Brisbane now offers glow in dark line markings where the lines will have more visibility while not requiring any electricity.

Glow in Dark markings guide us with important information such as:

- Upcoming vehicles
 - Speed limits
 - Bus, Car and bicycle lines
 - Pedestrians line
 - Lines to separate traffic
 - Disable car spot
-
- Car space numbers
 - Visitors car park
 - Pedestrian crossing
 - Forklift driving area
 - No entry

Markings are vital for safety and must be kept in visible and understandable condition, so users can navigate appropriately. Line markings are also important during night time and rely more on the markings in dark. This is why glow in the dark

epoxy markings are better options and markings have higher visibility than standard markings.

Line Marking: Colours, Patterns and Meanings

Popular colours:

- WHITE LINES painted on pavement indicates traffic traveling in one direction.
- Broken White Line: you may change lanes if it is safe to do so.
- Solid White Line: requires you to stay within the lane and marks the shoulder of the roadway.
- YELLOW LINES mark the centre of a two-way road used for two-way traffic. You may pass on a two-way road if the yellow centreline is broken. When a solid and a broken yellow line are together, you must not pass if you are driving next to the solid line. Two solid yellow lines mean no passing. Never drive to the left of these lines.

How line marking is done

3 easy steps on how line marking is done

1. Preparation

Prepare the area either by grinding, shot blasting, scrubbing, sanding or cleaning depending on the surface

2. Application

Apply line marker (Roadmaster or epoxy resin) and this can be applied by either brush, spray machine, epoxy roller or brush.

3. Coating

Polyurethane can be applied as top coat for extra protection
