

Metallic Epoxy Floor Coating

Metallic Epoxy

Metallic Epoxy Floor Coating these days is slowly finding its way into homes as an exotic looking flooring option. We have a variety of different colors and visual effects that create a glossy and deep looking beautiful floors.

Similar to other types of epoxy, metallic epoxy is made up of 100% solid epoxy with added metal pigments. The epoxy coating is self-leveling which can be manipulated to create different visual effects.

Are Metallic Epoxy Coating durable?

As beautiful as it looks, metallic epoxy coating is considered as a high-performance floor coating which can withstand heavy traffic and can last for years. Metallic Coatings are resistant to oil, chemicals, acids and are easy to maintain. Just like other epoxy coatings, this can be slippery when wet but Epoxy Flooring Brisbane provides you with a non-slip option.
